DETAILED ACTION

Response to Amendment

1. Applicant's amendment and remarks received on 05 August 2009 have been entered.

Allowable Subject Matter

2. Claims 3-9 and 19-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 3-7 and 19-21 were previously objected to as being dependent upon a rejected base claim. Applicant has amended the claims, as suggested by the Examiner. The reasons are repeated in this office action.

4. Regarding independent claim 3, the prior art of record neither shows or suggests a high-pressure discharge lamp comprising, in addition to other limitations of the claim, the second section of the first current path comprising two U-bends.

5. The closest prior art of Geselleschaft (GB 476,836) to independent claim 3 teaches, in Figures 1 and 2, a discharge lamp comprising an outer bulb (20) in which a discharge vessel (1) is arranged around a longitudinal axis, the discharge vessel enclosing, in a gastight manner, a discharge space provided with an ionizable filling, the discharge vessel having a first and a second mutually opposed portion forming a first and a second leadthrough through which a first (5) and a second (4) leadthrough conductor, respectively, extend to a pair of electrodes (2, 3) arranged in the discharge space, a lamp base (8) of electrically insulating material supporting the discharge vessel via a first current supply conductor (18), and a second current supply conductor (17)

electrically connected to the second leadthrough conductor forming a respective first and a second current path to the pair of electrodes, the lamp base also supporting the outer bulb, the outer bulb enclosing the first and second current supply conductors, the outer bulb being connected to the lamp base in a gas-tight manner, wherein the first leadthrough conductor includes: a first section extending from the first leadthrough along the longitudinal axis towards the lamp base, a second section bended away extending effectively traverse to the longitudinal axis, and a third section extending towards the first contact member. However, Geselleschaft fails to exemplify the second section of the first current path comprising two U-bends, as recited in independent claim

3. Due to their dependency upon claim 3, claims 4-6 and 8-9 are also allowable.
6. Regarding claim 7, the prior art of record neither shows or suggests a high-pressure discharge lamp comprising, in addition to other limitations of the claim, the weld of the first current supply conductor with the first leadthrough conductor being in the third section of the first leadthrough conductor.
7. The closest prior art of Geselleschaft (GB 476,836) to independent claim 7 teaches, in Figures 1 and 2, a discharge lamp comprising an outer bulb (20) in which a discharge vessel (1) is arranged around a longitudinal axis, the discharge vessel enclosing, in a gastight manner, a discharge space provided with an ionizable filling, the discharge vessel having a first and a second mutually opposed portion forming a first and a second leadthrough through which a first (5) and a second (4) leadthrough conductor, respectively, extend to a pair of electrodes (2, 3) arranged in the discharge space, a lamp base (8) of electrically insulating material supporting the discharge vessel

via a first current supply conductor (18), and a second current supply conductor (17) electrically connected to the second leadthrough conductor forming a respective first and a second current path to the pair of electrodes, the lamp base also supporting the outer bulb, the outer bulb enclosing the first and second current supply conductors, the outer bulb being connected to the lamp base in a gas-tight manner, wherein the first leadthrough conductor includes: a first section extending from the first leadthrough along the longitudinal axis towards the lamp base, a second section bended away extending effectively traverse to the longitudinal axis, and a third section extending towards the first contact member. However, Geselleschaft fails to exemplify the weld of the first current supply conductor with the first leadthrough conductor being in the third section of the first leadthrough conductor, as recited in independent claim 7.

8. Regarding claim 19, the prior art of record neither shows or suggests a discharge bulb comprising, in addition to other limitations of the claim, the second section of the first current path comprising two U-bends.

9. The closest prior art of Geselleschaft (GB 476,836) to independent claim 19 teaches, in Figures 1 and 2, a discharge bulb comprising a vessel (1) enclosing, in a gastight manner, a discharge space provided with an ionizable filling, the discharge vessel having a first and a second mutually opposed portion forming a first (5) and a second (4) leadthrough, and a first (12) and second (11) leadthrough conductor that extend, respectively to a pair of electrodes (2, 3) arranged in the discharge space, the first leadthrough conductor being shaped with a plurality of bends that facilitate direct connection to a current supply conductor in a lamp base (8), wherein the first

leadthrough conductor includes: a first section extending from the first leadthrough along the longitudinal axis towards the lamp base, a second section bended away extending effectively traverse to the longitudinal axis, and a third section extending along the longitudinal axis. However, Geselleschaft fails to exemplify the second section of the first leadthrough conductor including two U-bends, as recited in independent claim 19. Due to their dependency upon claim 19, claims 20-21 are also allowable.

10. The subject leadthrough conductor structure described earlier is provided for simplifying the construction of the device, thereby eliminating production faults. The design is new and unique to the art.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
